1. Executive Institutional Overview

The GreenCycle 22.0 Bigha complex is not merely an agricultural operation—it is a **high-margin, multi-revenue corporate growth engine for Ariel Group / Holdings**. Through the synchronized deployment of **Ariel Renewable Energy Limited (AREL)** and **Ariel Marketing & Communications Limited (ArielMC)**, Ariel captures economic value across **five distinct tiers**: (1) Sovereign Clean Microgrid Turnkey EPC; (2) Ariel-SaaS™ IoT Telemetry & Hardware; (3) Advisory & Green Loan Syndication Fees; (4) Recurring High-Margin Annual SaaS & Trading Spreads; and (5) A National Living Demonstration Flagship driving an estimated BDT 10.00+ Crore external commercial pipeline.

Year-1 Upfront Revenue	Year-1 Gross Profit	Recurring Annual Cash	10-Yr Cumulative Value	Strategic Pipeline

5. Strategic Showcase Flagship & Commercial Pipeline Multiplier

Beyond direct financial gains, the 22.0 Bigha complex establishes the **National Benchmark Living Demonstration Site** for both AREL and Ariel-SaaS™: • **Sovereign Industrial Showcase:** RMG factory owners (facing mandatory European CBAM decarbonization rules), pharmaceutical plants, and large agro-conglomerates will visit this live facility to witness TOPCon solar, containerized BESS, and sub-second SCADA operating synchronously. • **Corporate Pipeline Multiplier:** Hosting 10 institutional delegations annually is projected to convert **3 to 5 commercial C&I; Solar EPC contracts per year** for AREL, unlocking an estimated **BDT 10.00 to 20.00 Crore in external EPC contract pipeline** over 36 months. • **Enterprise Software Valuation:** Proving Ariel-SaaS™ telemetry under harsh rural grid conditions elevates the platform into an institutional-grade, internationally licensable Industrial IoT asset.
