THE GOLDEN FIBER

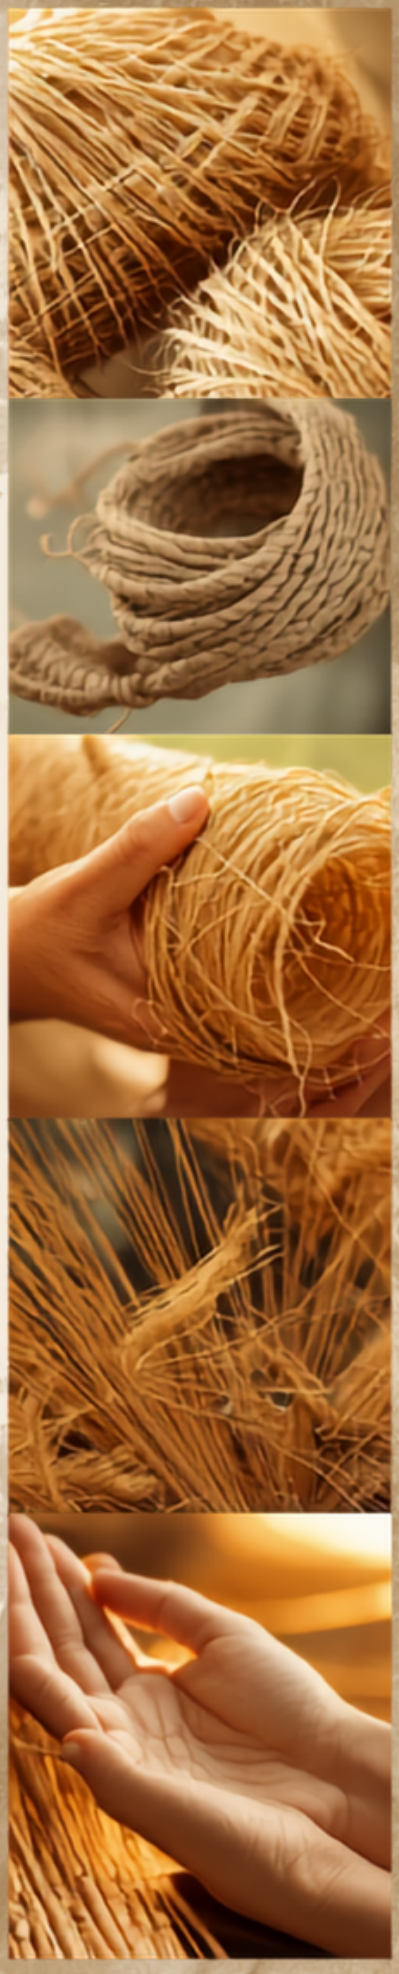

Natural Jute Goods

for Home &
Transit

FOREWORD

BUILT FOR A SUSTAINABLE FUTURE

Welcome to our 2026/2027 Export Compendium. As global supply chains accelerate toward circularity and carbon accountability, we partner with international retailers, wholesalers, and corporate enterprises to deliver natural fiber solutions without compromising on structural performance or aesthetic refinement.

Harnessing native, high-grade golden jute and sustainable composite trims, our vertically integrated manufacturing facility produces export-ready carry goods, office folios, lifestyle storage, and eco-packaging. We bridge the gap between traditional fiber cultivation and modern automated assembly—providing the volume scalability and rigorous quality control (AQL 2.5) demanded by global commerce.

Our Operational Execution Pillars

Circularity & Manufacturing

Our Operational Pillars

A treasuring group modality in four strong fibers.

Circularity & Low-Carbon Sourcing

100% natural, biodegradable raw jute with minimal carbon footprint, paired with Azo-free dyes and REACH-compliant protective coatings.

Manufacturing Four Ethical Compliance

Advanced pattern cutting, high-tensile reinforced stitching, and a monthly production capacity capable of scaling from low-MOQ test orders to multi-container shipments.

Ethical OEM & ODM Engineering

Audited supply chain standards ensuring fair living wages, transparent working conditions, and strict chemical safety across every production stage.

Open Terminal Foundational Outcomes

Turnkey custom design solutions, from proprietary Pantone matching and custom handle fabrication to bespoke private-label branding.

A Dedicated Global Trade Partner

Whether executing customized seasonal retail lines or high-volume corporate sustainability initiatives, our technical team works directly with your procurement department from initial digital prototyping through customs dispatch.

We invite you to explore this collection as a foundation for your brand's green supply chain goals.
