ARIELMC

ENTERPRISE RESOURCE PLANNING (ERP)

Comprehensive User Guide & Operational Manual

Official end-to-end operational handbook for **ArielMC** multi-entity stations. Covers product master catalogs, Bangladesh compliant factory auditing, R&D tech pack sampling, two-way order pipelines, bonded customs clearance, Mushak 6.3 VAT tax invoices, multi-station finance, user security, and autonomous AI copilot integration.

Publication Date:	October 16, 2026
Governing Entity:	**ArielMC** (Ariel Marketing & Communications Ltd)
Global Operating Stations:	🇧🇩 Dhaka (BD) • 🇬🇧 London (UK) • 🇺🇸 New York (US) • 🇪🇺 Frankfurt (EU) • 🇦🇺 Sydney (AU)
Security Classification:	`INTERNAL OFFICIAL USE`

Table of Contents

Chapter	Module & Operational Domain	Lifecycle Phase	Primary Role
Section 1	Executive Overview & 5-Station Multi-Entity Architecture	Foundation	Executive & SCM
Section 2	Phase 1: Sector Product Master & Sourcing Margin Engine	Phase 1 (Live)	Merchandiser
Section 3	Phase 2: Bangladesh Factory Compliance Auditing & Vetting	Phase 2 (Live)	Compliance Auditor
Section 4	Phase 3: R&D, Tech Packs & SDO Sampling Protocol	Phase 3 (Live)	R&D / Sampling
Section 5	Phase 4: Two-Way Order Management System (OMS) & Back-to-Back POs	Phase 4 (Live)	Supply Chain Lead
Section 6	Phase 5: Global CRM Pipeline & Buyer Account Intelligence	Phase 5 (Live)	Commercial / Sales
Section 7	Phase 6: Logistics, Bonded Warehousing & Bangladesh Customs	Phase 6 (Live)	Logistics & C&F
Section 8	Phase 7: Bonded Inventory & Raw Material Warehouse Transfers	Phase 7 (Live)	Warehouse Manager
Section 9	Phase 8: Multi-Currency Finance & Mushak 6.3 Tax Engine	Phase 8 (Live)	Finance Controller
Section 10	Phase 9: Security, User Profiles, 2SA & Role-Based Access Control	Phase 9 (Live)	Security / Admin
Section 11	Phase 10: PostgreSQL Persistence & Cloud Synchronization	Phase 10 (Live)	Data Architect
Section 12	Phase 11: **ArielMC** AI Copilot Operational Reference	AI Enhanced	All Users

1. Multi-Station Architecture & Global Footprint

ArielMC operates as a globally integrated sourcing and manufacturing conglomerate bridging Bangladesh's premier artisan manufacturing facilities with Tier-1 international retail brands across the United Kingdom, United States, European Union, and Australia.

1.1 The Five Operating Stations

Station Name	Jurisdiction	Base Currency	Tax & Regulatory ID	Operational Mandate
ArielMC BD	Dhaka, Bangladesh 🇧🇩	`BDT (৳)`	NBR BIN: `001928374-0101`	Direct factory contracting, compliance auditing, bonded warehousing (Chattogram), and raw material quality inspection.
ArielMC UK	London, United Kingdom 🇬🇧	`GBP (£)`	HMRC VAT: `GB-982-1049-22`	European buyer relations, Marks & Spencer / Harrods account management, UK customs import filing.
ArielMC US	New York, USA 🇺🇸	`USD ($)`	IRS EIN: `13-8472910`	North American retail accounts (Ralph Lauren, Crate & Barrel), US bonded distribution, FDA tableware clearance.
ArielMC EU	Frankfurt, Germany 🇩🇪	`EUR (€)`	USt-IdNr: `DE-304918274`	EU retail distribution (Zara Home, H&M Home), REACH compliance verification, CE marking.
ArielMC AU	Sydney, Australia 🇦🇺	`AUD (A$)`	ATO ABN: `51-829-104-921`	Oceania supply agreements, biosecurity import protocols for raw jute crafts and ceramics.

> **OPERATIONAL RULE: ENTITY SCOPE SWITCHING**
>
> In **ArielMC** ERP, switching the active operating entity in the top header immediately re-scopes financial ledgers, local statutory tax identifiers, default invoicing currencies, and applicable bonded export tariffs.

2. Sector Product Master & Costing Margin Engine

The Product Master catalog serves as the single source of truth for all products engineered and sourced through **ArielMC**. It unifies technical product specifications, international Harmonized System (HS) customs codes, factory ex-work purchase prices, and locked **ArielMC** sourcing margins.

2.1 The Four Core Manufacturing Sectors

- **Leather Goods**: Full-grain vegetable-tanned bovine leather, chrome-free aniline finishes, solid brass hardware. Audited under LWG Gold standard.
- **Jute & Biodegradable Crafts**: 100% natural golden jute fiber, handwoven braided weaves, certified organic cotton linings.
- **Apparel & Sustainable Textiles**: Heavyweight organic cotton french terry, mercerized pique, OEKO-TEX Standard 100 and GOTS organic certified.
- **Artisan Ceramics & Tableware**: High-fired porcelain, fine bone china, reactive glazes. LFGB and US FDA food contact safe.

2.2 Costing Margin Calculation Protocol

ArielMC calculates FOB target pricing via the standard formula:

```
FOB_Target_USD = Factory_ExWorks_USD + (Factory_ExWorks_USD × Ariel_Sourcing_Margin_Pct)
+ Inland_Bonded_Logistics_USD
```

All margins are contractually fixed between **18.0% and 35.0%**, ensuring competitive landed buyer pricing while guaranteeing sustainable margins across our operating stations.

3. Bangladesh Factory Network & Compliance Auditing

ArielMC enforces zero-tolerance compliance standards across all contracted manufacturing facilities in Bangladesh. No production order or SDO sample may be assigned to a factory lacking valid social, environmental, and structural safety audits.

3.1 Core Compliance Certifications Required

Standard	Governing Body	Key Verification Requirements
LWG (Leather Working Group)	LWG UK	Effluent Treatment Plant (ETP) operation, chromium waste containment, water stewardship.
amfori BSCI (Grade A/B)	amfori Europe	Living wage compliance, fair working hours, prohibition of child/forced labor, freedom of association.
SEDEX SMETA 4-Pillar	Sedex Global	Labor standards, health & safety, environmental performance, and business integrity.
OEKO-TEX Standard 100	OEKO-TEX Association	Zero harmful chemical residues, non-toxic reactive dyeing, skin-safety tests.
RSC / Nirapon	RMG Sustainability Council	Structural engineering integrity, electrical fire safety, automated hydrant sprinkler systems.

4. R&D, Tech Packs & SDO Sampling Protocol

Before bulk production, every product progresses through the **ArielMC Five-Stage Sample Development Order (SDO)** lifecycle.

Stage	Stage Name	Objective & Deliverables	Turnaround
Stage 1	**Lab Dip / Material Swatch**	Color matching, pantone lab dips (Light D65), physical leather strike-offs.	5 Business Days
Stage 2	**Proto Sample**	First 3D dimensional mock-up verifying silhouette and pattern ergonomics.	8 Business Days
Stage 3	**Fit / Size Set Sample**	Grading verification across complete size run (S to XXL or sizing tiers).	10 Business Days
Stage 4	**Pre-Production (PP) Sample**	Created on actual production lines using bulk raw material allocations.	12 Business Days
Stage 5	**Golden Seal (Approved)**	Signed, sealed master sample counter-stamped by both buyer and **ArielMC**.	Contract Gate

5. Two-Way Order Management System (OMS)

ArielMC utilizes a proprietary **Two-Way Order Execution Model**. When an export Sales Order is finalized with an international retail buyer:

1. **Buyer Contract Gate**: Buyer issues Letter of Credit (L/C) or Sales Contract at the agreed FOB landed rate.
2. **Back-to-Back PO Issuance**: **ArielMC BD** automatically issues a back-to-back Bangladesh Factory Purchase Order at the pre-negotiated Ex-Works rate, locking raw material commitments.
3. **Bonded Allocation**: Factory registers raw hide or yarn consumption declarations under **ArielMC**'s bonded warehouse quota.

6. Logistics, Bonded Warehousing & Bangladesh Customs

ArielMC oversees international ocean and air freight logistics connecting Bangladesh ports to destination hubs worldwide.

- **Ocean Freight (Chattogram Port - CGP)**: Primary export terminal for bulk containers (20ft / 40ft HC). Transit: 22-26 days to Southampton/Felixstowe (UK), 28-32 days to New York/New Jersey (USA).
- **Air Freight (Hazrat Shahjalal Int'l Airport - DAC)**: High-priority express consignments, fast-fashion replenishment, and Golden Seal courier parcels via DHL / FedEx.
- **Customs Clearance (C&F)**: Automated processing of Bill of Lading, Packing Lists, Certificate of Origin (Export Promotion Bureau - EPB), and GSP Form A.

7. Bonded Inventory & Raw Material Transfers

Under **ArielMC BD**'s National Board of Revenue (NBR) Bond License (`NBR-BOND-2024-C882`), imported premium raw materials (Italian veg-tan hides, Swiss dyes, YKK zippers) are stored duty-free at **Bonded Depot A-4 (Chattogram)**.

> **STATUTORY RULE: RAW MATERIAL UTILIZATION DECLARATION (UD)**
> Every square foot of imported leather and kilogram of organic yarn is tracked against authorized Bangladesh BGMEA / LFMEAB Utilization Declarations. Unauthorized domestic release carries severe statutory penalties.

8. Multi-Currency Finance & Mushak 6.3 Tax Engine

ArielMC ERP provides automated multi-station financial consolidation, FX hedging, and National Board of Revenue (NBR) VAT compliance.

8.1 Mushak 6.3 VAT Tax Invoicing Standards

Under the Bangladesh Value Added Tax and Supplementary Duty Act 2012, all commercial dispatches require an official **Mushak 6.3** tax invoice:

- **Deemed Exports**: Zero-rated (`0% VAT`) when backed by an export L/C or authorized bonded supply contract.
- **Domestic Institutional Supply**: Standard `15% VAT` plus applicable supplementary duties.

9. Enterprise Security, User Profiles & 2SA

To protect sensitive pricing, buyer relationships, and financial records, **ArielMC** enforces strict security layers:

- **Two-Step Authentication (2SA)**: All staff must enable 2SA via TOTP Authenticator (Google Authenticator) or encrypted WhatsApp OTP to `+8801819273458` .
- **Role-Based Access Control (RBAC)**:
  - **Managing Director**: Unrestricted global access, entity station configuration, and financial approval gates.
  - **VP of Global Sourcing**: Product master creation, factory allocation, and SDO approvals.
  - **Chief Compliance Auditor**: Factory audit scoring, ETP verification, and compliance flag toggles.
  - **Senior Merchandiser**: SDO sample tracking, courier dispatch, and buyer RFQ conversion.

10. PostgreSQL Database Persistence (Supabase)

The ERP leverages a dual persistence model:

- **Offline-First Local Cache**: Seamless operations even during temporary network drops in manufacturing zones.
- **Relational PostgreSQL (Supabase)**: Live relational cloud synchronization across `ariel_products`, `ariel_factories`, `ariel_samples`, `ariel_orders`, `ariel_leads`, and `ariel_consignments`.

11. The ArielMC AI Operational Copilot

The ERP incorporates an autonomous artificial intelligence operations copilot, named **ArielMC**. Located in the floating launcher at the bottom-right of the screen, **ArielMC** AI provides real-time operational answers:

Sample AI Query	Copilot Capability & Output
`"Show highest margin leather products"`	Ranks SKUs by sourcing margin percentage, displays factory ex-work vs. FOB target prices, and offers direct deep-link to Product Master.
`"List LWG Gold compliant factories"`	Filters 8 partner facilities, displays audit scores and certifications, and provides contact details for compliance officers.
`"How do I generate a Mushak 6.3 invoice?"`	Provides NBR statutory guidelines and triggers 1-click opening of the Official Document Center.
`"What is the status of Harrods SDO-2026-002?"`	Retrieves live SDO stage (Pre-Production), status, and DHL airway bill tracking number.

ArielMC ERP System Certification
